**Cash Drawer**   Cash drawers can either connect to a serial port (such as COM1 or COM2) or it can connect to the POS docket printer. You must enter the correct open drawer command for the drawer to open, Use Shift + F12 to test.

To setup a cash drawer with a serial interface, follow the following steps:
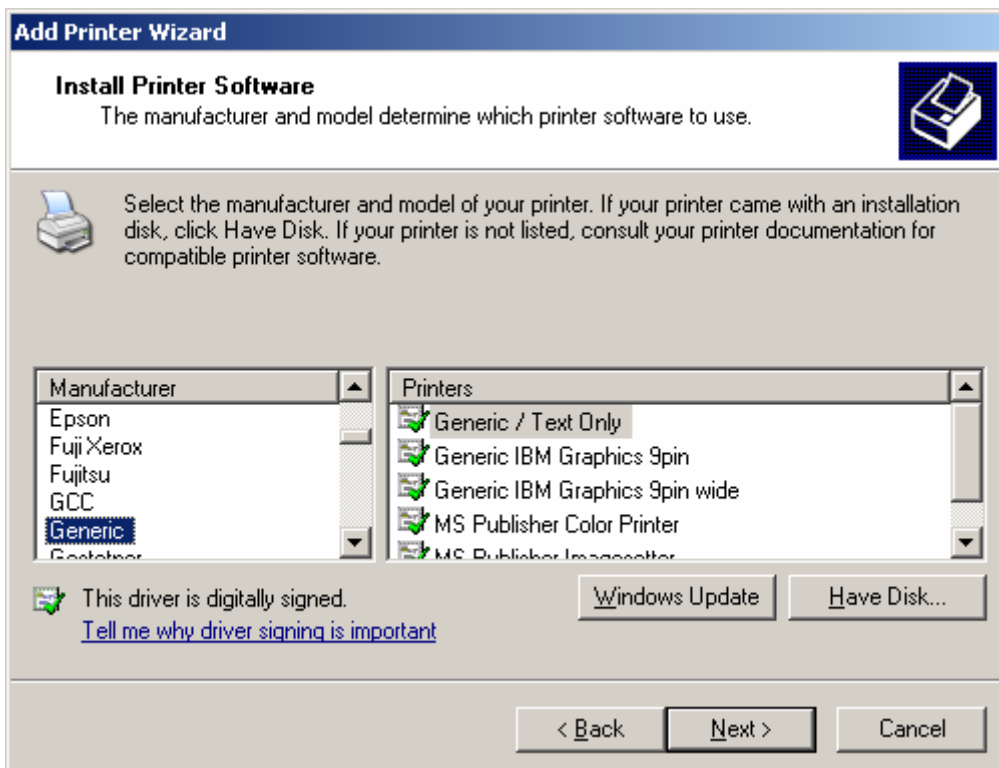

Click START > SETTINGS > PRINTERS > ADD NEW PRINTER

Choose the com port used by the device (pole display or cash drawer)

Add Printer Wizard

Select a Printer Port
Computers communicate with printers through ports.

Select the port you want your printer to use. If the port is not listed, you can create a new port.

○ Use the following port: `COM2: (Serial Port)`

Note: Most computers use the LPT1: port to communicate with a local printer. The connector for this port should look something like this:

○ Create a new port:
Type of port: `Local Port`

Choose the GENERIC / TEXT Printer

Add Printer Wizard

Install Printer Software
The manufacturer and model determine which printer software to use.

Select the manufacturer and model of your printer. If your printer came with an installation disk, click Have Disk. If your printer is not listed, consult your printer documentation for compatible printer software.

Manufacturer	Printers
Epson	Generic / Text Only
Fuji Xerox	Generic IBM Graphics 9pin
Fujitsu	Generic IBM Graphics 9pin wide
GCC	MS Publisher Color Printer
Generic	MS Publisher Imagesetter
Gestetner	

This driver is digitally signed.

Then rename to the device name used. Once this is done, the device name should appear in the HARDWARE Setup screen.

Add Printer Wizard

Name Your Printer
You must assign a name to this printer.

Type a name for this printer. Because some programs do not support printer and server name combinations of more than 31 characters, it is best to keep the name as short as possible.

Printer name:

Cash Drawer

Do you want to use this printer as the default printer?

○ Yes
⊙ No

[< Back] [Next >] [Cancel]

Once this is done, go to MAINTENANCE > SYSTEM SETUP > HARDWARE and adjust the settings as shown in the following screen.

Open Drawer "OPEN CASH DRAWER"

☐ Password Protect to Open Drawer

Note that in the OPEN DRAWER field, you can enter any text but it must be in between "quotes", otherwise you may get an error message.

If the Cash Drawer has a POS printer interface (Connects to the POS printer), then the setup is a lot simpler, all you have to do, is tick the CASH DRAWER CONNECTS TO POS PRINTER option and make sure the OPEN DRAWER field has the control sequence that is appropriate for the POS printer to open the drawer. Each POS printer has its own control sequence. If the POS printer is not listed in the POS printer list in the program, then you must obtain that information from the POS printer hardware supplier or from the user manual of that printer.

Note that most POS printers can emulate either the EPSON or the STAR POS printers, so you can try any of these two printers.

The following screen shows the setup to the cash drawer which is connected to the EPSON TM II POS Printer:
