

ChargeItPro Comprehensive Credit Card Processing Software

ChargeItPro is today's premier payment processing application for merchants requiring an integrated or standalone solution. ChargeItPro makes integration easy with ICVerify compatibility, secure APIS and dedicated integration specialists. Backed by over 40 years of industry experience, Payment Processing Partners developed ChargeItPro to overcome the complexities of the ever changing security standards, ease installation and support, and deliver superior reliability. Let ChargeItPro help you deliver the most secure, robust and easy to use payment processing solution in the market today.

ChargeItPro's fast IP processing will put a smile on every customers' face.

ChargeItPro Features:

- ❑ Supports all major credit card types (VISA™, MasterCard™, American Express, Discover, JCB)
- ❑ Processes all Credit, Debit and Gift Cards in the US and Canada
- ❑ Supports Retail, Mail Order/ Telephone Order, Internet and Restaurants
- ❑ Fast IP processing with dial-up backup
- ❑ Debit Pin Pad Support with zero integration
- ❑ Flexible solution that can run as an application or as a standalone product
- ❑ EasyIntegrator API makes integration into your existing solutions trouble-free
- ❑ IC Verify compatible applications supported
- ❑ Runs as an application or a Windows Service
- ❑ All sensitive cardholder data encrypted
- ❑ Zero administration embedded SQL database
- ❑ Supports SSL socket-based and file-based client-server communication
- ❑ Easy merchant setup and install with 100% support available from Payment Processing Partners

Easy Integration with 100% Support

The Easy Integrator API makes incorporating ChargeItPro into your solutions quick and smooth, and each developer is assigned an integration specialist for comprehensive support. ChargeItPro EasyIntegrator API is available in a .Net DLL or a Win32 OCX.

If you currently support IC Verify, you can upgrade your customers to ChargeItPro without changing your existing application. The Easy Integrator API also makes peripheral integration effortless with built-in support for card readers, pin pads, contactless card readers and more. Customization services are also available so that you know you will have a smooth integration no matter what your needs.

Robust Merchant Features

ChargeItPro makes it easy to get your customers up and running with no impact on your business. ChargeItPro works in any retail or service environment, as well as restaurant and mail order/telephone order. Merchants can process all credit card transactions including pin based debit cards. ChargeItPro supports both US and Canadian dollar merchant accounts. Installation and setup is made easy with extensive support from Payment Processing Partners. We'll even go in and set up your customer for you.

Merchants can easily integrate ChargeItPro into the way they work with flexible server configurations, automatic and manual settlement support, duplicate transaction controls, AVS settings and multiple-level security preferences. Secure, integrated remote maintenance ensures 24/7 access to any customer's system. With ChargeItPro, there has never been an easier way to give your customers the features they need to be successful.

Extensive Security Features

With ChargeItPro, all sensitive card holder data is encrypted and controlled by our software so it is kept secure throughout the transaction process. Extensive merchant security features include user-definable group-based security settings and options, user passwords, periodic password changes, failed login lockout, inactivity logouts and more as required by VISA™ Payment Applications Best Practices/CISP. All user activity including access to sensitive data is automatically logged. Daily data backups are performed automatically with an optional backup to a second location. With ChargeItPro you can be assured that your customer's data is secure.

Comprehensive Reporting

Your customers will be more productive with the comprehensive and flexible reporting options included in ChargeItPro. User-definable reporting periods and options including date range, sub-totals and clerk reports are available for merchants. ChargeItPro supports daily and monthly batch reporting for easy reconciliation. Reports are available in both 40 and 80 columns and can be output to many formats, including screen, printer, PDF and HTML.

**“Integrating our
accounting system
with ChargeItPro
has saved us
countless hours.”**
